

2010 - 2014 Commercial Vehicle Crash Summary

Summary

Special points of interest:

- 12% of all fatal crashes
- 8% of all serious injury crashes
- 105 Fatal Crashes
- 116 People Killed
- 406 Serious Injury Crashes
- 523 People Seriously Injured
- 39% Killed were unbelted (passenger and commercial vehicles ages 7 and older)

At the Idaho Transportation Department (ITD) our Strategic Plan is “Your Safety, Your Mobility, Your Economic Opportunity.”

ITD is committed to providing the safest transportation system possible. Each year progress is made to eliminate death and serious injuries on Idaho’s highways.

The goal, “Toward Zero Deaths”, is the foundation upon which we work.

The crash data summarized is a 5-year average, 2010 through 2014. The source of the crash information is the ITD statewide crash database which consists of crash reports completed by all law enforcement agencies in Idaho.

Table 1 shows the fatal and serious injury commercial vehicle crashes occurring in Idaho over the last five years based on road ownership and type. *Local roads are those roads that are not maintained by ITD.

Table 2 shows the commercial drivers involved in crashes by gender and age.

Males represent 91% of all commercial licensed drivers and are involved in 92% of commercial vehicle crashes.

Sixty eight percent of drivers were licensed in Idaho, 28% were from other states and the remaining drivers were from other countries (Canada 2.4%) or unlicensed.

Road Ownership and Types
